### WAR WILL LAST UNTIL AUGUST.

The war will end in August or September in the complete defeat of the Japanese," said to the Associated Press to-day a high authority in intimate touch with the Russian war plans, whose opinion can be taken faithfully to reflect the belief in the highest official quarters.

He continued: "How the Japanese can hope to succeed when our army in the East is strengthened to a point equal or superior in numbers to that of our adversaries we are honestly unable to comprehend. It will not be difficult to place 200,000, 400,000 or event 600,000 add..ional men in the field. if necessary. When our forces are concentrated and ready they will finish by driving the Japanese into the sea.

"Frankly, it seems to us that the Japanese either have utterly failed to appreciate Russia's resources, or have counted on the aid of Great Britain or the United States, neither of which ever contemplated becoming involved. So far as Great Britain is concerned, we do not believe any hallucinations

"We think the British statesmen who did so much to push Japan into war realized that with Japan's defeat they would accomplish two things for Great Britain-first, to give Russia a check; for, of course, the war must impede our progress temporarily; second, to cripple Japan's maritime power, which was beginning to be greatly felt in the Pacific."

It can be said with the utmost positiveness that Russia will bide her time. She will act on the defensive until she feels confident that her weight of numbers will leave no doubt as to the result. Reinforcements are going forward at the rate of 3,000 per day. Probably some time will clapse before Russia feels fully prepared to assume the offensive.

"To justify the holding of the defendants for trial it must be shown that their acts and conduct were not only unlawful, but were also malicious. "It is quite clear that there is no evidence before me to justify the belief that Inspector Walsh, in the placing of his subordinate efficers in the premises in question, had an evil intent, or that he was moved to this action by a wish or design to vex, annoy or injure the complainant or any other person or persons in the enjoyment of any lawful business or social amusement.

"Nor can malice be implied from the acts and conduct of the defendants. On the contrary, the presumption is in favor of the proposition that they were doing what they believed to be their duty. It is even contended that they were acting lawfully under the rather sweeping powers of section 315 of the Greater New York charter.

"It is true that they may interpret that section wrongly, with respect to the powers and duties of the police; but that, of course, would furnish no evilence of malice."
